

Specifications

Bar diameter 5-65mm

Bar length* 150-1540mm

Magazine capacity 550mm

Drive Servo Motor

Height range 850mm to 1260mm

Weight 430kgs

Voltage 230/415v max

Standard Features

Servo control

Part programme storage

Standard bar diameter range 5-65mm

Floor mounted sliding rails

Bar position accuracy to 0.1mm

Bar length measurement

Random bar lengths accepted from 150mm

Barfeed or shaft load

Controlled feed

Quick and easy set-up

User-friendly HMI screen

CE Certified

Additional features available to optimise your cycle time

Standard

Bar Capacity

The Multifeed 65 will cater for bar diameters from 5mm to 65mm diameter.

^{*}For bars longer than headstock length a Bar Support Unit is required

HMI screen

The operator friendly HMI screen gives you the flexibility to increase the automation of the Multifeed 65 to suit your manufacturing requirements.

Floor mounted sliding rails

The Multifeed 65 is fixed to floor mounted sliding rails, allowing the operator to move the Barfeed away from the machine tool in the Z axis. Once the Barfeed has been moved, the machine tool can be accessed safely.

The Multifeed 65 package includes:

Liner system
3 pushrods: 6mm, 12mm and 18mm diameter
Interface cable
Delivery
Installation
Operator training on day of installation
Full after sales support
