

Macc 391SV Semi Automatic Bandsaw UK

Machine Features

High-capacity band saw controlled by a two-speed motor driving a reduction unit with hardened bronze gear and a ground worm screw.

Appropriately dimensioned flywheels with strong blade guides with tight stress-raiser bearings and adjustable carbide tips.

Blade tension is obtained by electro-mechanical blade tensioner with a microswitch.

Safety switch devices on the flywheel casing, control handle and on the blade.

Cutting thickness 1,2mm

Adjustable stop for cuts of the same size

0,06kW – Coolant pump for blade lubrication

Pedestal with chip collection tray and removable coolant tank

Operation:

Cycle start is obtained by pressing the relevant start button. The machine performs the following operations during the cutting cycle:

1. vice closing and activation of blade motor
2. cutting bow downstroke
3. return of bow to initial position after the cut
4. blade motor stop
5. vice opening.

Possibility of manual cut
